General instructions:

- Electrical connections may only be carried out by qualified staff.
- These instructions do not accept responsibility for injuries or defects caused by improper use of this lamp.
- Attention! Before starting the installation, disconnect the power by turning off the circuit breaker, or by removing the fuse from the fuse box.
- Mind to use this lamp for its predetermined function. For example don't mount indoor lamps in outdoor areas.
- Please check all components are complete before installing.
- Don't cover the lamp.
- Don't connect the lamp to power and don't switch it on when it's in packing.
- Plug and connection elements must be kept dry during operation. An improper use is the risk of fire and by changing the bulb you can hurt yourself. Always use cool down lamps.

If the external flexible cable or cord is damaged, it must be exclusively replaced by the manufacturer or his service agent or a similar qualified person in order to avoid a hazard.

Please ensure that the specified bulb type and power of bulb is used. The manual warning should be followed (find the bulb symbol and the „max.“ on rating label on or lamp).

Don't mount the lamp on wet or conducting background.

Make sure that the cables or cords are not damaged during installation.

Markings on terminal block: L-phase, N-neutral wire, G-grounding wire.

The given main voltage must not be exceeded.

Plug and connection elements must be free of dirt and track strengths.
